

SAJJAD ANSARI

Senior Product Manager | Growth & Monetisation | 9 years experience in Product & AI
ansarisajjad8@gmail.com | +91-9098546878 | linkedin.com/in/sajjad-ansari | github.com/sajjad-yaqub

Professional Summary

I have **built and scaled businesses from 0 to \$1M+ in ARR** in my last two roles. I take full ownership of decisions and work across functions until systems run reliably without my direct intervention. I have hands-on experience developing ML models, building MCP pipelines, and leveraging AI tools, to solve real-world problems in acquisition, retention, and unit economics.

Experience

Senior Product Manager, e-Rickshaw Business Oct 2023 - Present
Yuma Energy - Battery swapping for EVs (Magna & Yulu JV)

*Led the e-rickshaw product suite. Built it from 0 and scaled it to 5% **marketshare** (NCR) in 1.5 years*
Growth

- Defined **value proposition** by doing qualitative user research of drivers and fleet operators
 - 'No penalty', 'Battery-free if wait time > 30 mins' acted as the primary acquisition hooks cited by drivers choosing Yuma over competitors
 - Acquired **16% market share** in 6 months in the **pilot geography** organically by crafting these
- Designed pricing constructs that suit drivers' earning and riding patterns during the **0 to 1** phase
 - Grew weekly driver **onboarding volume** by **80%** by introducing an EMI structure for SD payments
 - Increased **revenue** by **35%** by matching the subscription validity with the driver's earning cycle
 - Increased **swaps per driver** by **30%** by redesigning pricing models based on usage patterns

Customer experience

- Built a mechanism for drivers unable to take digital payments from passengers that led to **2.5x** digital **adoption without requiring smartphones or the internet**
- Reduced **swap time** from 15+ minutes to **under 3 minutes** by identifying frictions in the process through quantitative and qualitative analysis

Cost and efficiencies

- Increased battery **utilisation** by **18%** by devising faster return incentives for drivers
- Increased partner **referrals** by **80%** by reducing payment time to partners from 60 days to 5 days

Technical Product Manager Feb 2022 - Oct 2023

BLive - Multi-brand EV rentals & franchisee platform

*Led BLive from a low-margin franchise business to a **\$1.5 million** ARR fleet mobility platform*

- Drove **3x revenue growth** by leading the development of an IoT-enabled fleet platform that enabled the transition from EV sales to a rental-based model
- Increased **revenue** per store by **60%** across **40+ franchises** by developing centralised systems
- Shipped fleet tracking and a centralised dealer dashboard by **leading** a 5-member **team**

Senior Researcher, AI/NLP Jan 2018 - Jan 2022
IIT Kharagpur - Doctoral research

Pioneered and designed intervention tools for Indian dyslexic children using AI, NLP & Android

- Achieved **62.8%** accuracy on the first readability formula for Hindi words by using an **attention-based transformer model** on a self-curated dataset and annotated ground truth
- Enhanced student **retention rate by 75%** by applying **fine-tuned** clustering **ML algorithms** on training data collected through eye-tracking experiments

Co-founder Jul 2017 - Feb 2018
IITian's Career Academy - Established a competitive coaching institute and scaled to 100 students

Education

- M. Tech from **IIT Kharagpur**, specialising in Computer Vision
